COMPANY DESCRIPTION
SAP’s vision is to help the world run better and improve people’s lives. As the cloud company powered by SAP HANA®, SAP is a market leader in enterprise application software, helping companies of all sizes and industries run better. SAP empowers people and organizations to work together more efficiently and use business insight more effectively. SAP applications and services enable our customers to operate profitably, adapt continuously, and grow sustainably.

At SAP, we believe in the power of collaboration and empower our employees to perform at their best in an environment that encourages free and open expression of ideas. You’ll work alongside creative thinkers who share your interests, while turning big ideas into reality for our customers. With innovative job training, mentors to help you grow, and the flexibility to balance your work and personal life, you’ll be able to get more out of your career. It’s no wonder that some of the sharpest minds from around the world are working for a company that is consistently recognized as a global top employer.

Now it’s your turn to take the next step and help make the world Run Simple.

ABOUT SAP

As market leader in enterprise application software, SAP helps companies of all sizes and industries run better. From back office to boardroom, warehouse to storefront, desktop to mobile device – SAP empowers people and organizations to work together more efficiently and use business insight more effectively to stay ahead of the competition.

PURPOSE AND OBJECTIVES

There is hardly any business area that is not affected by the Big Data wave, but customers struggle with a broad adoption due to the complexity of the solutions and lack of guidance from trusted suppliers.

The SAP Data Hub is a new member of the SAP product family with the beta release in June 2017. It enables customers to efficiently manage and coordinate big data scenarios in a complex system landscape spanning classic SAP applications, data warehouse installations and new Hadoop-based setups. It is an XS/A-based application plus a SAP VORA based execution engine for data pipelines (aka VFlow). It is tightly integrated with SAP VORA big data management, HANA and BW/4 HANA.
The Data Hub Orchestration Team is responsible for the Node.js development on XS/A. This comprises the backend components and services for the UIs, the orchestration engine to schedule and manage tasks across different systems, and interacting with the data hub adapter to execute big data processes / pipelines. This puts the team into a very central position as the proxy and coordinator between all major groups in the larger Data Hub development project with locations all around the SAP globe.

EXPECTATIONS AND TASKS

As a developer of the SAP Data Hub Orchestration Team you work in a growing agile team alongside experienced colleagues and early talents in Walldorf. You are focusing on design, coding, testing and quality assurance of specific product features.

You will carry out research and development activities in Big Data Management
You will have the opportunity to work on cutting-edge technologies in the field of Big Data, in-memory, and Cloud
The output of these activities will drive the “SAP Data Hub” to a wide adoption
You will be in close touch with customers and stakeholders of the new product
You will support customers and applications that use the new product

EDUCATION AND QUALIFICATIONS / SKILLS AND COMPETENCIES

Required skills

High interest in big data scenarios and modern data warehouse and data management technologies
Good programming skills in one of the following languages Node.js/JavaScript, Scala, Java, C++, - preferably Node.js, with a passion to build high quality applications
Work in an agile development environment which requires the individual to be self-driven, take decisions independently and be flexible in order to cater to demand
Very good university degree in computer science or related technical discipline
Fluent German and English, both spoken and written

Preferred skills

Experience with development on XS/A and/or Cloud Foundry
Experience with databases, SQL, NoSQL
Experience in working with Hadoop/Spark
Experience with build and container tools like Maven, Jenkins, Docker, Kubernetes

WORK EXPERIENCE

Entry level
0-2 year or above

LOCATION

Walldorf, Germany
