LOOKING FOR SMART MINDS!

Full stack PHP Developer (m/f)

As a web developer, you are an active part in building websites and realizing e-commerce projects. You will work independently for exciting international, well-known companies in close coordination with our project managers. Your tasks also include adaptation and optimization of existing applications, as well as integration and testing of new technologies. The area of responsibility is very wide and versatile – which is why you should be motivated, committed, flexible and you should enjoy working both independently and in teams.

YOUR SKILLS
- Good knowledge of OOP with PHP
- Good MySQL or Oracle database skills
- Advanced experience in common web standards such as HTML, CSS, JavaScript and JavaScript Frameworks
- University degree in Computer Science or a similar education as well as a minimum of 2 years professional experience as a web developer (preferably Typo3)
- Able to pick up and learn new technologies quickly
- Good German language skills written and spoken (at least B1)

YOUR ROLE
- You take ownership over the conceptual design and implementation of new applications with PHP
- You participate in the continuous improvement of front end and back end components, improving performance, usability, stability etc.
- You test new applications and push code into production
