(Junior) Developer SAP HANA MDC - HANA Platform Core (Berlin)

About SAP HANA

SAP HANA is SAP’s ground-breaking in-memory database platform. It provides a powerful foundation for existing SAP products as well as for new applications on device, in the cloud and on premise.

SAP HANA’s cutting-edge technology for main memory, multi-core processing, and data management enables real-time analysis in combination with online transactional processing of business data.

We want to strengthen SAP HANA’s position as a first-class cloud citizen, as the cloud and database as a service (DBaaS) are gaining in importance.

About SAP HANA Multitenant Database Containers

SAP HANA Multitenant Database Containers offer the capability to run multiple tenant databases in a resource and cost efficient way in a single SAP HANA system and provide full isolation between tenant databases.

Our developers work closely with other teams of developers in Europe, North America, and Asia, to implement flexible, reliable, and scalable solutions, using the latest innovations in hardware, operating systems, and virtualization technology.

As a developer in the SAP HANA Multitenant Database Container team in Berlin, Germany, you will be responsible for analysis, design, implementation, testing, continuous improvements, documentation, and maintenance of the SAP HANA Multitenant Database Container functionality with a strong focus on optimizing the memory footprint of the overall system.

Within our team, we practice a trust-based working model and apply the DevOps principles. If you need to work from another location on a temporary basis, or during different hours you can do so given your manager’s agreement.

At SAP in Berlin, in addition to SAP HANA Multitenant Database Containers, we also focus on the following areas of SAP HANA core development:

• Backup and Recovery
• Development Infrastructure
• High Availability and Disaster Recovery
• Lifecycle Management
• Security
• Statistics Server

All the features we provide are supported by strong User Interface (UI) tools.
