

## **Appetizer Rhetoric in Higher Education (SU Teaching Assistant and Learning Program; module: Learning)**

**Target groups:** students, guest and auditing students, tutors from all faculties, doctorate students without teaching task, anyone else, who is interested

**Content:** What can we all learn from the ancient Greeks for our studies? Concepts for presentations in the sense of rhetoric are definitely part of it. These concepts also come into play in science slams. In our studies, these concepts are introduced more or less consciously. The first basic elements of rhetoric can be reflected upon and tried out in this appetizer workshop. For more in-depth knowledge, we recommend the workshop “TA\_L Präsentieren” (10 AE).

**Lecturer and Program manager:** Dr. Birgit Roßmanith has been head of the University Didactics Unit at the SU at ZeLL since 2008.
