

# INTERNATIONAL CONFERENCE

## AI-based crime investigations: a game changer to privacy?

Part I  
University of Saarland  
(Germany)  
March 6<sup>th</sup> and 7<sup>th</sup>,  
2025

Part II  
University of Strasbourg  
(France)  
May 15<sup>th</sup> and 16<sup>th</sup>,  
2025

### Call for contributions for a “World Café”

This conference aims to bring together the opinions of the various players concerned by the usage of AI in criminal investigations and the consequences for personal data that these cause. Thus, practitioners of criminal investigation, young researchers in data protection and privacy, AI law and criminal law present their points of view. This conference is organised by Yamina Bouadi, LL.M. and Maria Gahn, LL.M., and conducted under the scientific supervision of Prof. Dr. Dominik Brodowski, LL.M. (UPenn) and Prof. Dr. Juliette Lelieur.

**At this young researchers conference, we will give twelve students from Saarland University and Strasbourg University the opportunity to take part in the conference free of charge and to discuss their own research ideas with the participants in a “World Café”.**

*More information  
and contribution:*

#### Opportunities:

- Participation in the young researchers conference on “AI-based crime investigations: a game changer to privacy?” in Saarbrücken and Strasbourg
- Short presentation (5 minutes) in a “World Café” in small groups followed by a discussion (15 minutes) in the Strasbourg part
