

The PCB seminar is an interdisciplinary seminar series, hosting speakers from research fields in physics, chemistry and biology.

Invited speakers present their current research, together with an introduction to their area to give easy and understandable access to leading science projects.

In the following is a list of speakers for the upcoming PCB seminar

Jun.-Prof. Dr. Jannika Lauth	University of Tübingen	Transient Absorption Spectroscopy and 2D Semiconductor Nanostructures	13.05.25
Jun.-Prof. Jennifer Meyer	Technical University Rheinland Pfalz	Dynamics of Transition Metal Ion Molecule Reactions	22.05.25
Assist. Prof. Dr. Guillermo Monreal Santiago	University of Strasbourg	Coacervates for Chemistry	10.06.25
Prof. Dr. Marc Brecht	University of Tübingen	Imaging and High-Resolution Spectroscopy of Biological Systems and Bio-nano Hybrids	01.07.25
Prof. Dr. Martin Brandt	Technical University Munich	Semiconductor Donor Spin Systems Characterised by Conductivity	tba

The seminars will be from 16:00 to 17:00, in the Department for Physical Chemistry  
Building B2 2, room 0.06  
Tea and Coffee will be served.
