

Anorganisches Kolloquium

Wintersemester 2024/'25

- 24.09.2024: Prof. Dr. Rory Waterman / University of Vermont
(Dienstagstermin!) **Advances in Catalytic Hydrophosphination**
- 02.10.2024: Dr. David Martin - CNRS Director of Research / University Grenoble Alpes
(Mittwochstermin!) **Reductive Activation with N-Heterocyclic Carbene Organocatalysts**
- 07.11.2024 Prof. Dr. Carsten von Hänisch / Philipps-Universität Marburg
Silicon-based ligands, interpnictogen compounds and the use of SbH₃ in organometallic chemistry
- 23.01.2025 Svenja Pohl / Arbeitskreis Kickelbick
Synthesis and Structural Investigation of Softenable Polyorganosilsesquioxanes and their Applications
- 30.01.2025 Dr. Christian Hering-Junghans / Leibniz-Institut für Katalyse
Teaching Old Dogs New Tricks – The Chemistry of Phosphanylidenephosphoranes
- 06.02.2025 Prof. Dr. Hubert Huppertz / Leopold-Franzens-Universität Innsbruck
Explorative Solid State Chemistry – From Fundamentals to Applications

Die Vorträge finden **DONNERSTAGS** um **17:15h** in **C43 – 0.03** (kleiner Hörsaal II) statt.
