

Anorganisches Kolloquium

Sommersemester 2022

- 28.04.2022 Dr Michael Cowley – University of Edinburgh
Oxidative Addition and Reductive Elimination at Aluminium
- 05.05.2022 Marc Hunsicker – AK Scheschkewitz
From derivatization of silsesquioxanes to interlinkage with a siliconoid as silicon monoxide model system
- 02.06.2022 Max Briesenick – AK Kickelbick
Preparation of novel highly refractive index polysiloxanes and silsesquioxanes containing naphthyl and phenanthrenyl groups
- 30.06.2022 Julian Messelberger – AK Munz
Search for multiply-bonded palladium & lead complexes
- 07.07.2022 Carsten Müller – AK Schäfer
Coordination Chemistry of Magnesocenes, Heavy Tetrelocenes and Related Tin Half-Sandwich Complexes
- 14.07.2022 Prof. Dr. Holger Kohlmann – Universität Leipzig
**Silicate hydrides, hydridosilicates, silicane and polysilylenides
– new combinations of silicon and hydrogen**
- 28.07.2022 Sergi Danés – AK Andrada
New venues in aluminium chemistry: aluminoborates as synthons in nucleophilic substitutions
