

Anorganisches Kolloquium

Wintersemester 2021/2022

- 09.12.2021 Dr. Andreas Berkefeld / Eberhard Karls Universität Tübingen
Conditioning 3d Metal Molecular Structures to Energy Conversion by S/C/O Platforms
- 20.01.2022 Bastian Oberhausen / Arbeitskreis Kickelbick
Induction Heating Induced Self-Healing of Nanocomposites
- 27.01.2022 Prof. Dr. Viktoria Däschlein-Gessner / Ruhr-Universität Bochum
Metallated Ylides: From the s-Block to the p-Block to Catalysis
- 03.02.2022 Prof. Dr. Ulrich Siemeling / Universität Kassel
Stable N-heterocyclic Carbenes with a 1,1'-Ferrocenediyl Backbone and Their Heavier Analogues

Die Vorträge finden **DONNERSTAGS** um **17:00h** in **C6 3 – 0.10** (großer Hörsaal der Physik) statt.
