

Lecture Announcement

Winter Semester 2026/27

Sustainable & Circular Engineering

Lecturer(s):

Prof. Dr.-Ing Michael Vielhaber

Dr.-Ing. Simon Moersdorf

Further information:

Scope and Credits: 2 SWS (3 CP)

Lecture: Thursday – 10:00-12:00 (from Oct. 22)

Start: October 13, 2026, 13:00-16:00

Location: A5 1, 3.19

QR-Code LSF:

Description & Content:

Sustainability and Circularity are both goals and prerequisites for the successful development of products and technical systems of the future. In this course, students of the engineering bachelor's degree programs learn the essential basics and concepts of sustainability and the circular economy with a special focus on the analysis and evaluation of products and systems. The course is also open to students of other degree programs.

Target group:

Students of bachelor programs in engineering, esp. Systems Engineering

Students of master program Sustainable Materials and Engineering

Other interested students
