

Transcending boundaries – Thinking internationally

Located in south-western Germany, Saarland University is known for its interdisciplinary, cutting-edge research, award-winning start-up culture and its broad range of degree programmes many of which are internationally oriented. With its unique German and French roots, Saarland University has always embraced a distinctly European perspective. This distinctive European identity is reinforced by the university's location close to Germany's borders with France, Luxembourg and Belgium. Its strong international profile in research and teaching is reflected in numerous partnerships with universities and research institutes around the world, as well as in its large community of international students and staff. In total, around 16,300 students are enrolled at Saarland University across some 150 degree programmes.

Research-oriented academic programmes

Saarland University is a research-intensive university with an outstanding research ecosphere. This is reflected in its high level of external research funding, the international visibility and global networks of its researchers, and the many renowned non-university research institutes located on campus. From the very start of their studies, the next generation of researchers at Saarland University benefit from close collaborative interaction with these institutes:

- CISP – Helmholtz Center for Information Security
- German Research Center for Artificial Intelligence (DFKI)
- Fraunhofer Institute for Biomedical Engineering (IBMT)
- Fraunhofer Institute for Non-Destructive Testing (IZFP)
- Helmholtz Institute for Pharmaceutical Research, Saarland (HIPS)
- INM – Leibniz Institute for New Materials
- Institute for Future Energy Systems and Material Flow Management (IZES)
- Korea Institute of Science and Technology Europe (KIST Europe)
- Max Planck Institute for Informatics (MPI-INF)
- Max Planck Institute for Software Systems (MPI-SWS)

Saarland University's online magazine: <https://campus.uni-saarland.de/>

- Schloss Dagstuhl – Leibniz Center for Informatics (LZI)
- SEI – Saarland Engineering Institute
- Steinbeis Material Engineering Center Saarland (MECS)

Future-proof qualifications

Saarland University provides students with excellent qualifications that open doors to diverse and rewarding career paths. We offer a comprehensive support package for students looking to start their professional journey or who are aiming to set up their own business. Our Career Center supports students and recent alumni as they transition from campus to career. The Early Career Office offers support and guidance to researchers during the early stages of their careers. Working professionals can continue their education by taking one of the university's wide range of advanced professional study programmes or certificates:
