The Helmholtz Institute for Pharmaceutical Research Saarland (HIPS) conducts research into novel active substances to combat infectious diseases. The institute, which is located in Saarbrücken, was jointly founded in August 2009 by the Helmholtz Centre for Infection Research (HZI) and Saarland University. HIPS established a new research facility on the Saarland University campus in 2015 that currently employs about 200 researchers from around the world. The next few years will see a significant expansion of HIPS's scientific activities, which will also involve substantial enlargement of the existing buildings and facilities – all of which is being coordinated in close cooperation with Saarland University.

HZI/HIPS is a member of the German Center for Infection Research (DZIF), an association of 35 universities, hospitals and research institutes whose goal is to coordinate and promote translational infection research. In addition to being a well-established scientific network, DZIF, members have access to the internal infrastructure and to a wide range of funding options.

Saarland University is a campus university with a pronounced international focus and strong research profile. With a large number of other external research institutes in the vicinity of the university and dedicated support for collaborative research projects, Saarland University is an ideal location for innovation and technology transfer. As part of its continuing drive to expand research excellence and in light of its close involvement with the expansion of the Helmholtz Institute for Pharmaceutical Research Saarland (HIPS), Saarland University is looking to further strengthen its position as a leading interdisciplinary research centre. Key areas of research are located at the interface of medicine, bioinformatics, pharmaceutical science and drug development, with research being conducted both in the university's Faculty of Medicine and in its core research field 'NanoBioMed'.

The Faculty of Medicine at Saarland University is currently active in four DFG-funded Collaborative Research Centres and in numerous other cooperative research projects. There are about 2200 students presently enrolled in the medical and dentistry programmes at Saarland University. In collaboration with the Faculty of Natural Sciences and Technology (NT) and the Faculty of Mathematics and Computer (MI), the Faculty of Medicine also contributes to degree programmes in the areas of human and molecular biology, bioinformatics, biophysics and pharmaceutical science.

To further strengthen their cooperative ties, Saarland University and HIPS are issuing a joint call for applications for a

**W3 Professorship in Medical-Pharmaceutical Microbiota Research (m/f/x)**
(Reference: W1971)

at the Faculty of Medicine to commence at the earliest opportunity.

The professorship is intended as a bridge between the Faculty of Medicine and the Helmholtz Institute for Pharmaceutical Research Saarland.

The successful candidate will be a graduate in medicine, pharmaceutical science or a natural science and will have a proven research record in microbiota analytics, microbial genomics and/or microbial natural product research. The person appointed to this position should deliver a strong basic research element that expands and deepens existing research work in the field of interdisciplinary infection research, particularly the characterization, modularization and modelling of infection-specific microbiota, natural products with therapeutic potential and molecular therapeutic strategies. The candidate must demonstrate excellence and expertise in medical, pharmaceutical, molecular biological and/or microbiological research. The appointee will be expected to work closely with the Institute for Medical Microbiology and Hygiene at the Centre for Infectious Diseases at Saarland University Medical Center in Homburg and to collaborate with research groups in the preclinical disciplines, pharmaceutical science, natural sciences and bioinformatics at Saarland University and at the Helmholtz Institute for Pharmaceutical Research Saarland (HIPS). The successful candidate will work primarily at HIPS, but, as a professor in the Faculty of Medicine, will also interact closely with clinical researchers on the Homburg campus, particularly in the areas of infection research and drug research.

We are looking for an individual with an established international reputation in their field and an outstanding record in both teaching and research who will contribute significantly to the progress of ongoing projects and will play a key role in establishing new interdisciplinary and interfaculty collaborative projects.

German version at www.uni-saarland.de/stellen
The appointment will be made in accordance with the general provisions of German public sector employment law. Candidates must have experience in and an aptitude for academic teaching. They will have a PhD or doctorate in an appropriate subject and will have demonstrated a capacity for high-quality, independent research either through a Habilitation or advanced scientific work at a level equivalent to a German Habilitation or by having been appointed to a junior professorship. We expect applicants to have published high-quality academic papers on relevant topics and to have experience in securing external funding especially for research projects. The successful candidate will also be expected to contribute innovative teaching concepts at all academic levels (Bachelor’s, Master’s and doctoral programmes), to teach in English and, where applicable, in French, to provide dedicated supervision to students working on their final-year theses and to support and foster junior researchers.

At Saarland University, we view internationalization as a process spanning all aspects of university life. We therefore expect members of our professorial staff to engage in activities that promote and foster further internationalization. Special support will be provided for projects that continue with or expand on collaborative interactions within existing international cooperative networks, e.g. projects with partners in the European University Alliance Transform4Europe (www.transform4europe.eu) or the University of the Greater Region (www.uni-gr.eu). In accordance with the objectives of its affirmative action plan for women, Saarland University is actively seeking to increase the proportion of women in this field. Qualified women candidates are therefore strongly encouraged to apply. Preferential consideration will be given to applications from disabled candidates of equal eligibility.

To apply for this position, please submit your application by no later than 21st October 2021 via Saarland University’s online professorial appointments platform: www.uni-saarland.de/berufungen. Application documents must be uploaded as a single PDF file (max.10MB) and must include the following documents: letter of application (addressed to the Dean of the Faculty of Medicine, Prof. Dr. Michael D. Menger); CV/résumé (including your home address, telephone number and email address); copies of relevant academic qualifications; a list of publications, a summary of your previous experience in academic teaching and research (incl. teaching appraisals, if available); types of external funding secured and amounts; a two-page paper detailing your teaching concept and a two-page research concept; and your three most significant publications of the last five years.

When you submit an application to Saarland University you will be transmitting personal data. Please refer to our privacy notice for information on how we collect and process personal data in accordance with Art. 13 of the General Data Protection Regulation (GDPR) (www.uni-saarland.de/data protection). By submitting your application you confirm that you have taken note of the information in the Saarland University privacy notice.
