

REFUGEES ARE WELCOME!

German Physical Society (DPG) launched a project "Physik Für Flüchtlinge" for children and young people in the refugee camps. <http://www.dpg-physik.de/pff/index.html>

Everybody is welcome to participate!

Teaching experience with kids is very welcome, but not mandatory. The physics knowledge is not mandatory at all. Your motivation and a good will is more than enough!

The actions to take:

- Go to a camp in Zweibrücken or Lebach for 1.5 hours (9:30-11:00 AM or 2:30-4 PM)
- Play with children (school age): watch the video of one experiment and then distribute the materials so that they can try to repeat the experiment (easy play, no special physics knowledge is required - we will learn together with the kids ;)
- No specific language knowledge is required.
- Share your hope and positive point of view on life with people in a difficult moment.

When:

Any day you could devote to it from the **1st to the 24th of December** will make a big impact. If you can devote more than one day, kids will love you!

How to join:

Contact the coordinator Oxana Mishina by email: omishina@gmail.com
Write the subject of your email as: [DPGSaar Volunteer-Your Full Name]
