2 x Working Student (f/m) Front-End/UX Development

Pxio is a fresh start-up company recently spun off from the German Research Center for Artificial Intelligence (DFKI) and is looking to extend its local team on Saarland University Campus. We are experienced software developers with a proven and patented core technology. In an effort to meet the demands of our industry clients we are currently in the process of turning our technology into a software product – a distributed local and cloud service software infrastructure in the field of video and visual information collaboration. To this end, we are looking for two talented front-end and user experience (UX) developers to start in October 2017.

Responsibilities

- Understand user requirements and how they translate towards application features
- Collaborate with our team to set specifications for new applications
- Design creative UI/UX prototypes according to feature specifications
- Design and implement the overall UX as part of the application front-end
- Write high-quality source code for application development within deadlines
- Conduct functional and non-functional application testing
- Evaluate and update existing applications according to new UX demands
- Develop technical documents and handbooks to accurately represent application design and code

Requirements

- Full-time student currently enrolled, typically pursuing a technical degree
- Proven experience in designing and building user-centric applications
- In-depth knowledge of web technologies like Node.js and modern XHTML/CSS/JavaScript frameworks
- Excellent understanding of software design and programming principles
- A team player with excellent communication skills in speech and writing
- Analytical thinking and problem-solving capability
- Great attention to detail and time-management skills
- Available for 16–20 working hours per semester week (options for more hours during the semester break)

What we offer

- Active participation in the early stages of a technology startup
- An engaged team with flat hierarchies and agile processes
- Flexible working hours in our offices in the middle of Saarland University campus
- Abundant opportunities to learn and advance your knowledge and skillset
- Options for full-time jobs after completing your studies
