Internship – Quality Assurance Engineer (M/F)

Are you looking for a hands-on learning experience in which you will be able to build specialist skills and expertise as a Quality Assurance Engineer?

With us, you won’t be making coffee or copies, unless it’s for yourself!

As a FINOLOGEE intern, you will join a young and dynamic team of skilled and specialized professionals (Product Managers, Designers, Frontend/Backend Developers) who will train and coach you to fully develop your potential.

You will use the latest software and leading-edge development tools to build the most innovative products in the Luxembourg FinTech sector.

You will work in a happy atmosphere where team spirit and a good sense of humour are key ingredients.
With us you will

- Work closely with **product owners and business analysts** to make sure the entire team perfectly understands all the details of the product requirements.
- Contribute to **test cases** and **test scenarios**, covering all possible corner cases.
- Help developing test plans and **create automatically executable test scripts** using Robot Framework, Selenium, SoapUI and more...
- Make sure **test coverage** remains high and developers actively contribute to the test efforts.
- Integrate automated tests into the continuous delivery cycle using Jenkins, AWS or Azure pipelines...

What we expect from you

- **Advanced studies** in Computer Science or any related field
- Basic knowledge of Selenium, Robot Framework or Soap UI would be an asset
- Have an eye for details and be **rigorous** and **meticulous** in execution
- A **pro-active** mind-set with a positive, “can-do” attitude
- Be comfortable with taking on **responsibility and ownership** of your tasks
- A strong **curiosity** for innovation and eagerness to work in a **fast-paced start-up culture**
- Be a **nice co-worker**, be collaborative and reliable
- Fluent **English** and/or **French**.

In return you will get

- An **empowering internship** experience and a **fair compensation**
- The opportunity to be part of our experienced and **close-knit team** and to work directly with the **company founders**
- A nice place to work: **spacious and modern offices** located close to Luxembourg-City
- **Transport allowance** or free parking
FINOLOGEE – About us...

FINOLOGEE specialises in creating new experiences for the financial industry. We build truly digital platforms and products, such as our fully digital platform that enables financial industry players to quickly onboard new customers and our access-to-account gateway providing banks with a ready-to-use and secure product to enable triggering of payments and data retrieval from their customers’ accounts. For that purpose, the founders of FINOLOGEE created Digicash the Luxembourg banks’ mobile payment product, and Mpulse that handles SMS routing and payments with telcos, over the last years. FINOLOGEE is their latest venture, its goal is to create new digital B2B2C platforms and ecosystems for the financial industry. We are both a start-up at heart, with all the forceful ingredients of a fast-paced product building environment, and we will be operating as a financial services professional, regulated and supervised. This is what makes us unique, this is where, why and how we create digital excellence.

Our skilled and experienced team use the latest IT tools to develop cutting-edge digital platforms, following the Agile methodology. We work with:
