WORKING STUDENT (f/m)
RESEARCH

Location: Darmstadt (Hessen/Germany)

For our headquarters in Darmstadt we are looking for a student assistant to support our research department in publicly funded research projects in cooperation with partners from industry and research institutions.

Your tasks
Your responsibilities include the implementation, integration and testing of prototypes that demonstrate the results of research. Your start date is as soon as possible.

Your profile
Ideally you are a student of computer sciences in the middle of your studies. Following skills are required for the fulfillment of the tasks:

• Windows® and Linux® operating system knowledge
• Software engineering knowledge
• Good programming skills, particularly in Java®
• Knowledge in the areas of data science and machine learning

Good English and German language skills and the ability to work independently and collaboratively in a small team round off your profile.

Interested?
Please submit your detailed application by using our online procedure including a possible starting date and your salary expectations: https://jobs.softwareag.com.

Your application should include a short motivation letter, a CV and your references.
