COMPANY DESCRIPTION
SAP’s vision is to help the world run better and improve people’s lives. As the cloud company powered by SAP HANA®, SAP is a market leader in enterprise application software, helping companies of all sizes and industries run better. SAP empowers people and organizations to work together more efficiently and use business insight more effectively. SAP applications and services enable our customers to operate profitably, adapt continuously, and grow sustainably.

At SAP, we believe in the power of collaboration and empower our employees to perform at their best in an environment that encourages free and open expression of ideas. You’ll work alongside creative thinkers who share your interests, while turning big ideas into reality for our customers. With innovative job training, mentors to help you grow, and the flexibility to balance your work and personal life, you’ll be able to get more out of your career. It’s no wonder that some of the sharpest minds from around the world are working for a company that is consistently recognized as a global top employer.

Now it’s your turn to take the next step and help make the world Run Simple.

Do you want to be at the cutting edge of true Enterprise SaaS, developing new features and re-engineering our solution? You are not afraid to influence the experience of 40 million Business Travellers by providing a high class, highly scalable and reliable service that these customers love to use? From inception to deployment, we need you to incorporate cutting-edge architecture and technologies to deliver world-leading micro-services at consumer scale.

PURPOSE AND OBJECTIVES
In this role, you will collaborate and communicate with highly skilled teams around the globe to deliver exceptional customer satisfaction for SAP Concur’s Travel products, embracing end-to-end service ownership in a truly DevOps culture.

EXPECTATIONS AND TASKS
Write software that delivers world-class experience for your users: SAP Concur Travel is the leading corporate travel tool in the world. Our users deserve the best, and you can help lead the way!

Design and/or re-factor code to scale to outrageous numbers of users: The biggest corporate travel tool is growing, and we our product needs to scale along with our customers.

Be a technical leader on a great team: As a SDE Senior, you will get a voice in design of new features and re-architecting existing ones. We hire smart people and then encourage them to make smart decisions rather
than pushing designs from the top down.
Be a mentor to other developers: Help other developers grow in technical skills, leadership skills, architecture skills, and in many other ways. One strong mentor can make the whole team better, and you’ll have that opportunity.
Maintain a work/life balance: We are not a sweatshop. Our developers work hard and have challenging problems to solve, but they go home at the end of the day and enjoy their evenings and weekends. We can’t promise we’ll never work late, but we can promise that it is not accepted as “normal.”
Take design and architecture seriously. Get the chance to design things the right way, to scale and perform as a world class product.
Take quality seriously. You have time for unit tests, integration, and automation.
Learn new skills. We don’t change technologies just for the sake of changing technologies, but we will use the right tool for the job. If the right tool is a new tool, you can use it.
Use interesting tools like AWS and no-SQL solutions to solve interesting challenges
Get a chance to think about how to scale a feature to millions of users, and implement your design!

EDUCATION AND QUALIFICATIONS / SKILLS AND COMPETENCIES

BSCS, BSEE, or equivalent years of work experience.
7+ years in a technical related field.
Effective communication skills, focusing on presentation of technical information.
Advanced knowledge of software design and development process.
Strong experience with web and web service development (REST, SOAP)
Strong programming knowledge of C#
Major competency in at least two additional computer languages.
Demonstrated knowledge of software tools, documentation process, and development process. Works on complex problems where analysis of situations or data requires an in-depth evaluation of various factors.
Broad knowledge of QA processes.
Broad knowledge of requirements gathering.
Awareness of business issues and their impact on product development.
Exercise judgment within broadly defined practices and policies in selecting methods, techniques, and evaluation criteria for obtaining solutions.
Excellent knowledge of JSON, XML data formats
Excellent programming knowledge of one of the scripting languages
Knowledge of Golang is a plus

SAP'S DIVERSITY COMMITMENT
To harness the power of innovation, SAP invests in the development of its diverse employees. We aspire to leverage the qualities and appreciate the unique competencies that each person brings to the company.
SAP is committed to the principles of Equal Employment Opportunity and to providing reasonable accommodations to applicants with physical, sensory and/or mental disabilities. If you are interested in applying for employment with SAP and are in need of accommodation or special assistance to navigate our website or to complete your application, please contact us at Careers.Germany@sap.com. Requests for reasonable accommodation will be considered on a case-by-case basis.
