AkknaTek GmbH is a young startup company and specialized in development of innovative technologies in the field of medical imaging. To strengthen our team in Saarbrücken or Kaiserslautern in the field of embedded systems, we are looking for a motivated and qualified team member as:

Software engineer in the field of embedded systems (m/f)

What you can expect:
As a software developer you can expect responsible and diversified tasks. You will be involved in planning and implementation of software and hardware systems, as well as technical documentation. Through your actions you will actively contribute to development and design of our products and therefore profit from an interesting and challenging market field. Furthermore you will also be involved in the discussions with the potential project partners.

Your profile:
- Bachelor or Master degree in computer sciences, electrical engineering, mechatronics, biomedical engineering, or comparable studies
- Professional skills in microcontroller programming
- Practical experience in embedded systems
- Practical skills in PCB designing using Eagle
- Understanding of data acquisition technologies is very desired
- Experience in technical documentation is advantageous
- Team work, creativity, motivation
- Experience with deadlines
- Knowledge of German language is not required

What we offer:
- Promotion prospects and steep learning curve
- Opportunity for permanent employment
- Possibility to get experience in the field of medical devices
- Friendly and open minded working atmosphere
- Flat hierarchies and fast decision making
- Flexible and family-friendly working hours

Interested?
If you are interested we are looking forward to your application, including your salary expectation, as well as your next possible date of joining via mail to: career@akknatek.com
